

Acknowledgments

Acknowledgements of the Editors

The creation of this book would not have been possible without the great support of many people. We are particularly grateful to all contributors and authors who dedicated a lot of time and effort to this project and who have shown a lot of patience with the editors. The editing of this book was only possible through the dedicated and thorough work of our assistants Tilla Roy (style and language editing of English chapters and supervision), Arturo Bejerano and Catalina Aguilar (both style editing of Spanish chapters). A central role in the editing process falls to Michelle Marcotte and Josh Biro who made many sacrifices to keep the project on track. We are also grateful to our many interns who helped with enthusiasm to create this book. Fiona Bahr and Juliane Kulesa merit special thanks, but there were many others. Many thanks to Natalia Canessa and Jörg Mehnert for their creativity and dedication to the lay-out. Special thanks to Fritz Häussermann who sacrificed his spare time to improve and homogenize the introductory figures.

We are very thankful to the CONAF 12th Region, NAVIMAG, Naviera Austral, Fundación Futuro, Fundación Pumalín, Fundación Otway, Patricia Faundéz, la familia Maldonado (Auchemo), Nelly y "Papaya" (Camping Paico, Quellón), and especially Germán Coronado and his crew from the Yepayek for logistic support.

A special thanks to our sponsors who are mentioned in order of contribution magnitude: Enersis (main sponsor), Census of Marine Life (NaGISa), Fundación Huinay, BIOPAT (www.biopat.de) and PADI Foundation.

The editorial team and the authors are very grateful to the following scientists for proof-reading and input regarding the chapters and/or translations. Their great effort was very much appreciated and significantly improved the quality of this taxonomic field guide (any remaining mistakes are the responsibility of the editors):

Dr. Robert Pankhurst, NERC Isotope Geosciences Laboratory, England (geology); Simon Higginson, Universidad de Chile (geography); Dr. Leif Djurfeld, University of Gothenburg,

Sweden (oceanography); Dr. Graham Edgar, University of Tasmania, Australia (fjord ecology); Dr. Maria Uriz, CEAB, Spain, and Dr. Ruth Desqueyroux-Faundez, Muséum d'histoire naturelle de Genève, Switzerland (Porifera); Dr. Odalisca Breedy, Universidad de Costa Rica (Octocorallia); Dr. Estefanía Rodríguez, University of Ohio, USA (Introduction Cnidaria, Introduction Anthozoa, Actinaria, Corallimorpharia); Dr. Oscar Ocaña, Universidad de Ceuta, Espana (Scleractinia); Dr. Stephen Cairns, Smithsonian Institution (Scleractinia, Stylasteridae/Hydrozoa); Dr. Luis Alberto Acosta, Pontificia Universidad Javeriana, Colombia (Zoantharia); Dr. Mike Dawson, University of California Merced, USA (Scyphozoa & Staurozoa); Dr. Álvaro Altuna (Hydrozoa); Dr. Nicola Reiff, Zoological State Collection Munich, Germany (Polycladida, Polychaeta, Sipunculida, Echiura); Dr. Juan Junoy, Universidad de Alcalá, Spain (Nemertea); Dr. Sandra Gordillo, Universidad Nacional de Cordoba, Argentina and Dr. Moisés Aguilera, Chile (Polyplacophora); Dr. Carlos Gallardo, Universidad Austral de Chile (Bivalvia, Gastropoda); Dr. Alejandro Salcedo, Mexico (Cephalopoda); Dr. Sandra Millen, University of British Columbia, Canada (Opisthobranchia); Dr. David Bybee, University of Hawaii, USA (Polychaeta); Dr. Walter Sielfeld, Universidad de Iquique, Chile (Pycnogonida); Mauricio Cerda Lema, Chile (Cirripedia); Dr. Marcos Antonio Retamal, Universidad de Concepción, Chile (Decapoda); Yvan Hinojosa, Universidad Católica del Norte, Chile (Peracarida, Nemertea, Introduction Crustacea); Dr. Abby Smith, University of Otago, New Zealand (Ectoprocta); Daniel Navarro, Instituto Antártico Chileno (Brachiopoda); Erika Mutschke, Universidad de Magallanes (Crinoidea, Asteroidea, Ophiuroidea, Echinoidea); Dr. Francisco Solis Marín, México (Holothuroidea); Dr. Karen Sanamyan, Kamtschatka, Russia (Ascidacea); Dr. Ulrich Schliewen, Zoological State Collection Munich, Germany and Dr. Roberto Menendez, Universidad de Chile ("Pisces").

Acknowledgements of the Authors

Francisco Herve (Geology): Thanks to the merciless demands of Vreni Häussermann, we progressed through the process of producing this book; without her it would have never been printed. Special thanks to Ben Machado. F. Hervé's picture was taken by Mark Fanning on board the yate Morgane II of Captain Gilles Rigaud. *María Soto (Geography)*: To Rosemarie Vieira, (Geographer, MSc in Geography; Ph D. in Marine Geology), for providing the photos. To the geographers Joselyn Arriagada and Rodrigo Moreno for helping with the cartography and population data, respectively. *Marcus Sobarzo (Oceanography)*: Results presented in this publication were generated by research that was partially supported by CONICYT (Chile) grant 1050487. Data from Comau Fjord come from this project. *Philippe Willenz et al. (Porifera)*: Field work relative to the Porifera chapter was made possible through the financial or logistic support of Fundación Huinay, NAVIMAG, CONAF (Corporación Nacional Forestal), the Geo-Bio-Center-LMU and the PADI Foundation. Philippe Willenz is thankful to the Belgian Science Policy Office, the Léopold III Funds for Nature Exploration and Conservation, Iberia and LAN Chile for travel support. Donat Willenz is thanked for fieldwork assistance. Laetitia Despontin and Julien Cilis prepared the scanning electron microscopy pictures at the Royal Belgian Institute of Natural Sciences. Eduardo Hajdu is thankful to the National Council for Scientific and Technological Development and the Rio de Janeiro Research Support Foundation, both from Brazil, for the provision of grants which permitted participation in all expeditions, as well as organization and coordination of some of these. He is also thankful to the Hertha Meyer Laboratory of Cellular Ultrastructure at the Federal University of Rio de Janeiro where scanning electron microscopy has been undertaken through access granted by Marcia Atthias and technical support provided by Noêmia Fernandez. Renata Silvano Gomes is thanked for technical assistance in the laboratory, and Daniela Almeida Lopes for technical assistance in the field. Ruth Desqueyroux-Faundez thanks the G&A Claraz Foundation for travel funds. Mariana Carvalho is thankful to CAPES (Coordenação de Aperfeiçoamento de Pessoal de Nível Superior) and CNPq (Conselho Nacional de Desenvolvimento Científico e Tecnológico - "National Counsel of Technological and Scientific Development") Dr. Michelle Klautau thanks FAPERJ and CNPq. *Actinaria and Corallimorpharia*: We are very grateful to Estefanía Rodríguez for proof-reading the chapter and for the very helpful suggestions. *Frédéric Sinniger (Zoantharia)*: Thanks

Jan Pawlowski and Helmut Zibrowius for their support and advice. *Carolina Zagal (Scyphozoa & Staurozoa)*: Many thanks to M. N. Dawson for identification of *Aurelia* aff. *aurita*. *Enrico Schwabe (Polyplacophora)*: Markus Unsöld (ZSM) kindly provided line drawings of chitons. Dr. Boris Sirenko (Zoological Institute St.-Petersburg) is thanked for helpful comments and stimulating discussions. *Diego Zelaya (Bivalvia and Gastropoda)*: The author wishes to express special thanks to Cristián Ituarte for his valuable comments and suggestions, and all those who graciously offered photographs to illustrate the chapters of gastropods and bivalves, especially Gregorio Bigatti for the photo of the egg capsules of *Odontocymbiola magellanica*; Alexander Bortolus for the photo of *Trophon geversianus* egg-laying; to Cristian Jorda for the photos of live *Bankia martensi*; Diego Luzzato for the photos of the egg capsules of *Trophon geversianus*, *Acanthina monodon* and *Adelomelon ancilla*; Roland Meyer for the photo of the live example of *Macoma inornata* and the example of the ventral view of *Crepidula dilatata*; Evangelina Schwindt for a photo of *Brachidontes purpuratus*; and David Thompson for the photos of the live example of *Fissurellidea patagonica* and the *Fusitriton magellanicus* egg-laying. *Michael Schrödl (Opisthobranchia)*: My sincere thanks go to all individuals who helped in the field, especially to the crew and scientific team of the Yepayek for an unforgettable expedition. The backbone for the opisthobranch chapter is the book "Sea Slugs of southern South America" (ConchBooks); the publisher Klaus Groh is thanked for letting us reproduce several of the illustrations. The German Research Foundation (DFG) and the GeoBioCenter of the Ludwig Maximilians-University Munich provided financial support. *Roland Melzer (Pycnogonida)*: Travel grants from the "GeoBioCenterLMU" and "Freunde der Zoologischen Staatssammlung" are gratefully acknowledged. Special thanks go to Stefan Friedrich (Munich) for organizing the data base for the samples collected in the Chilean fjords. *Fabio Pitombo (Cirripedia)*: I am deeply indebted to Dr. Bill Newman for his friendship, support, and encouragement and also for the continuous enlightenments provided and for the valuable comments on the barnacle chapter. *Martin Thiel and Iván Hinojosa (Peracarida)*: Thanks to Macarena Bravo and Nuxia Espinoza for their help with the illumination in some pictures. We are thankful to Oliver Coleman, Jim Lowry and Alan Myers for their help with some species identifications and to Jon Norenburg for his hospitality during repeated visits to the National Museum of Natural History of the

Smithsonian Institution in Washington, DC. *Hugo Moyano (Ectoprocta)*: To the people in the SEM laboratory of Universidad de Concepción, and also Fundación Huinay that has sent interesting and valuable material from southern Chile. Best wishes and success. *Diego Martínez (collaborator Ectoprocta)*: Thanks to the Huinay Foundation for the bryozoan material that permitted me to do the work to obtain the Biology degree. *Igor Smirnov (Ophiuroidea)*: We thank V. Häussermann and J. Ahearn for comments and help. Supported by Russian programs “Biodiversity” and “Antarctic”, and international project CAML. *Phil Lambert (Holothuroidea)*: Thanks to Vreni and Fossi and the staff at Huinay Scientific Field Station for collecting, photographing, and shipping specimens used in preparing this chapter.

Marcos Tatián and Cristian Lagger (Ascidiacea): Special thanks to Vreni Häussermann and Günter Försterra for the samples and César Cárdenas for samples and pictures of *Synoicum giardi* and *Pyura legumen*. We are very grateful to Karen Sanamyan for his important comments on the manuscript. Financial and logistic support were provided by Consejo Nacional de Investigaciones Científicas y Técnicas (CONICET), Universidad Nacional de Córdoba and Fundación Huinay. *Germán Pequeno (“Pisces”)*: To Vreni Häussermann, Günter Försterra and the team of the Huinay Scientific Field Station for their support. To the Dirección de Investigación (Universidad Austral de Chile) and Comité Oceanográfico Nacional (CONA), which provided support to several projects to study fishes in the south of Chile.

Fig. 1. The harsh climate makes expeditions to the Chilean Fjord Region a challenge, but the spectacular nature compensates for it.

Fig. 2. For the study of most parts of the Chilean coast a mobile field laboratory is necessary.

Fig. 3. The Huinay Scientific Field Station provides infrastructure for research in the Chilean Fjord Region.
